⚠ FLAGGED

Stop sparring and see a doctor.

Three heavy-contact sessions in eight days, your punch test down two tests running, and two mornings logged “flat”. That pattern is worth a professional look.

This app does not and cannot diagnose anything. It watches the pattern and tells you when to go to someone who can.

Tonight

21:40

ONE THING, THEN SLEEP

Breathing down-regulation

Sleep & Heart is your brake today. Slow exhales before bed is the fastest lever you have on it — nothing else you do tonight moves it more.

► Start

DID IT ACTUALLY WORK

Mon	Breathing, 10 min	HRV +6 ms
Sun	Cold shower, 3 min	no change
Sat	In bed 45 min early	HRV +11 ms

Breathing and early nights move your numbers. Cold water does not — you have tried it four times. It has stopped being suggested.

WEIGHT TO FIGHT NIGHT

74.6 kg

✓ CUT IS SAFE

2.1 kg over, 32 days left. Holding 0.5 kg a week gets you there with a week spare.

We track the cut and warn you when it stops being safe. We will never tell you how much more could come off, or how to take it off faster.
